Profile

Software engineering student in my 4th year at FIUBA passionate about building robust applications and solving complex problems. I pair a deep technical foundation with sharp communication skills and the adaptability to thrive in fast-paced environments. I am actively seeking new professional opportunities to bring my proactive mindset and collaborative energy to an engineering team.

Education

University of Buenos Aires (FIUBA)

Computer Engineering

Buenos Aires, Argentina

2023 – Present

– 66% completed.

Technical Skills

Programming Languages: Rust, Go, Python, Java, C++

Frameworks & Infrastructure: Spring Boot, FastAPI, React, PostgreSQL, Docker, Git, Linux

Core Competencies: Concurrent Programming, Distributed Systems, Object-Oriented Design, REST APIs, Agile

Languages: Spanish (Native), English (B2)

Projects

Consorcio Digital – Building Management Platform | *Python (FastAPI), TypeScript, React*

- Led product discovery via user interviews, translating insights into a Product Vision Board and validated hypotheses.
- Facilitated Agile backlog prioritization and user story mapping to scope an MVP (auth, automated expenses) and release roadmap.
- Ran usability testing cycles, iterating on UX friction points and edge-case logic.

Need for Speed Clone – Multiplayer Racing Engine | *C++20, Box2D, POSIX Sockets*

- Drove backend development and server coordination for real-time game state and concurrent lobbies within a 4-person team.
- Implemented authoritative server-side rigid-body physics (Box2D), custom collision dispatching, and dynamic NPC vehicle behaviors.
- Engineered a fixed-step 60 FPS game loop utilizing the State Pattern to coordinate lobby stages, racing sessions, and player upgrades.

Distributed Bicycle & Banking System | *Rust, Actix, Tokio*

- Designed a fault-tolerant, distributed bike-sharing network over a logical ring topology.
- Implemented the Actor Model for asynchronous message passing and thread-safe state isolation without low-level locks.
- Built a replicated banking cluster using a Two-Phase Commit (2PC) protocol and majority quorums for transactional integrity.

Additional projects at santilorido.github.io.

Soft Skills

Teamwork & Peer Leadership: Reliable team player who steps up to support peers, organize efforts, and maintain momentum on shared goals.

Communication: Sharpened through fast-paced, customer-facing retail work demanding clear communication under pressure.

Adaptability: Comfortable navigating dynamic requirements and technical roadblocks in fast-moving environments.

Independent Research & Problem-Solving: Ability to quickly grasp technical documentation, adopt new tools, and learn independently as challenges demand.

Work Experience

Equus Argentina

Sales Associate & Cashier (Seasonal)

Buenos Aires, Argentina

Jul 2025 – Aug 2025

- Managed high-volume transactions and provided personalized customer service in a fast-paced retail environment.
- Developed strong attention to detail and rapid problem-solving skills under pressure.
